

## Primary Partner Online Survey, January, 2019

### Additional comments:

1. There is still room to grow in making sure the partnerships around LIPS are fit into the broader spectrum of planning in the municipality, but the commitment is there to make sure the fit is done well.
2. Some of these questions are too early to answer. For example, I need to arrive in Edmonton and then I can tell how was my experience. I am in Grassland half way then I cannot answer such question truthfully. The Network under the LIP program has just started and it needs sometimes to get tuned and fully get on the road to understand whether it can run properly or not. I do not know, I did not feel really well with these questions. You need to finish a meeting before you can evaluate how the meeting was. You need to give sometime for the facilitator to run a project such is LIP/NIN Network before you can really evaluate. Any way I hope it helps.
3. Network members working together makes a great impact and progress to our community. Thank you for establishing this group.
4. I think other than a few members there's is limited consistency to who attends the meeting. The NIN network has been a sharing circle for the longest time. It needs to move away from that reputation to move forward with strategic planning. Also, members who don't attend regularly don't get to see what NIN is doing other than networking.

All members share a common purpose for the network.

12 responses

Members are adding value to each other's work.

12 responses

The network is creating value for the constituents it serves.

11 responses

Together, members have identified strategic goals and objectives for the network.

11 responses

Members are creating new knowledge or insights together.

12 responses

Members honor their commitments to the network.

12 responses

Network plans reflect network goals.

11 responses

The way the network communicates with stakeholders builds support for the network

11 responses

Members are achieving more together than they could alone.

12 responses

Members are working jointly to advance network goals.

12 responses

The network is able to attract additional funds, as needed.

10 responses

Decision making processes encourage members to contribute and collaborate.

12 responses

The network's internal communications systems are serving it well.

11 responses

Members reflect on the network experience and adjust network practice accordingly.

12 responses

As a network, members have the CONNECTIONS they need to advance network goals.

12 responses

The network anticipates, surfaces, and addresses conflict when it arises.

11 responses

The network has mechanisms in place to promote accountability among members (e.g., agreements, understandings).

12 responses

As a network, members have the MATERIAL RESOURCES they need to advance network goals.

12 responses

All members are contributing time and resources to the network.

12 responses

The network is meeting its strategic goals and objectives.

10 responses

As a network, members have the SKILLS they need to advance network goals.

12 responses

The work of the network is attuned to the comfort and energy levels of members.
